Subject: 4 Seasons Pourable Pothole Filler

Phone: (517) 373-0184  
Fax: (517) 373-8040

In going back through our records over the past eight years in the majority of areas where we have used the pot hole filler it is still in place since it was installed. Our old way of patching with cold patch we would be lucky to get through half the winter without it popping out before spring and deeping the hole even more where it was just cold patch repaired. The 4Seasons patches are still holding up today. This stuff is not cheap but if you need to hold an area together for longer than a few months, you need the 4Seasons patch. It bonds to existing asphalt like no other product we have seen or used. We have used it on some alligator asphalt areas and it is holding it all together after 7 winter seasons. It also has been used in some concrete jointed sidewalk areas and is superb in bonding between the gaps and moves with the concrete during the freeze thaw cycle. The other nice feature is that it sets up quickly so you can open up parking areas & traffic lanes shortly after the patching cures.

We are believers in this product and recommend it highly to any agency that needs a quick & lasting asphalt repair; this is the product to be use. If you need any further information please feel free to contact me about this product.
